Pagination | 4940-50
Date Published | 2005
ISSN | 1362-4962
Keywords | Archaea, Archaeal Proteins, DNA Helicases, DNA Replication, DNA-Binding Proteins
Abstract | The origin recognition complex, Cdc6 and the minichromosome maintenance (MCM) complex play essential roles in the initiation of DNA replication. Our studies have focused on the interactions between these proteins and their implications for the initiation of archaeal DNA replication.
