Three-dimensional structure of H-2Dd complexed with an immunodominant peptide from human immunodeficiency virus envelope glycoprotein 120.

Title: Three-dimensional structure of H-2Dd complexed with an immunodominant peptide from human immunodeficiency virus envelope glycoprotein 120.

Publication Type: Journal Article

Year of Publication: 1998

Authors: Li, H, Natarajan, K, Malchiodi, EL, Margulies, DH, Mariuzza, RA

Journal: J Mol Biol

Volume: 283

Issue: 1

Pagination: 179-91

Date Published: 1998

ISSN: 0022-2836

Keywords: Animals, beta 2-Microglobulin, Crystallography, X-Ray, H-2 Antigens, HIV Envelope Protein

Abstract: The crystal structure of the mouse major histocompatibility complex (MHC) class I molecule

DOI: 10.1006/jmbi.1998.2091

PubMed ID: 9761682

Grant List: AI36900 / AI / NIAID NIH HHS / United States
