An essential aspartic acid at each of two allosteric cGMP-binding sites of a cGMP-specific phosphodiesterase.

Title: An essential aspartic acid at each of two allosteric cGMP-binding sites of a cGMP-specific phosphodiesterase.

Publication Type: Journal Article

Year of Publication: 1995

Authors: McAllister-Lucas, LM, Haik, TL, Colbran, JL, Sonnenburg, WK, Seger, D, Turko, IV, Beavo, JA

Journal: J Biol Chem

Volume: 270

Issue: 51

Pagination: 30671-9

Date Published: 1995 Dec 22

ISSN: 0021-9258

Keywords: 3',5'-Cyclic-GMP Phosphodiesterases, Allosteric Site, Amino Acid Sequence, Animals, Aspartic Acid

Abstract: The amino acid sequences of all known cGMP-binding phosphodiesterases (PDEs) contain internally homologous repeats (a and b, with the invariant aspartic acid being crucial for interaction with cGMP at each site.
