
Title: A highly conserved nuclear gene for low-level phylogenetics: elongation factor-1 alpha recovers morphology-based tree for heliothine moths.

Publication Type: Journal Article

Year of Publication: 1995

Authors: Cho, S, Mitchell, A, Regier, JC, Mitter, C, Poole, RW, Friedlander, TP, Zhao, S

Journal: Mol Biol Evol

Volume: 12

Issue: 4

Pagination: 650-6

Date Published: 1995 Jul

ISSN: 0737-4038

Keywords: Animals, Base Sequence, Conserved Sequence, Genes, Insect, Introns, Molecular Sequence

Abstract: Molecular systematists need increased access to nuclear genes. Highly conserved, low copy number protein-encoding nuclear genes and presumably other highly conserved genes hold much promise for phylogenetics of Tertiary age eukaryote groups.
