| Title               | High-resolution definition of vaccine-elicited B cell responses against the HIV primary receptor binding site.  |
| Publication Type    | Journal Article   |
| Year of Publication | 2012  |
| Authors             | Sundling, C, Li, Y, Huynh, N, Poulsen, C, Wilson, R, O'Dell, S, Feng, Y   |
| Journal             | Sci Transl Med  |
| Volume              | 4   |
| Issue               | 142   |
| Pagination          | 142ra96   |
| Date Published      | 2012 Jul 11   |
| ISSN                | 1946-6242   |
| Keywords            | AIDS Vaccines, Amino Acid Sequence, Animals, Antibodies, Monoclonal Antibodies  |
| Abstract            | The high overall genetic homology between humans and rhesus macaques in the HIV primary receptor binding site suggests that the high-resolution definition of vaccine-elicited B cell responses against the HIV primary receptor binding site in rhesus macaques may be applicable to humans. |
| DOI                 | 10.1126/scitranslmed.3003752  |
| Alternate Journal   | Sci Transl Med  |
| PubMed ID           | 22786681  |
