Comparative genome analyses reveal sequence features reflecting distinct modes of host-adaptation between dicot and monocot powdery mildew.

Title	Comparative genome analyses reveal sequence features reflecting
Publication Type	Journal Article
Year of Publication	2018
Authors	Wu, Y, Ma, X, Pan, Z, Kale, SD, Song, Y, King, H, Zhang, Q, Presley, C
Journal	BMC Genomics
Volume	19
Issue	1
Pagination	705
Date Published	2018 Sep 25
ISSN	1471-2164
Abstract	<p>BACKGROUND: Powdery mildew (PM) is one of the most important</p> <p>RESULTS: We compared genomes of the four dicot PM together with</p> <p>CONCLUSIONS: Compared to monocot (grass) PM fungi, dicot PM fungi</p>
DOI	10.1186/s12864-018-5069-z
